

## ***Confessions of an Eyewitness***

"I've been in the sign and billboard industry for 20 years.

After hearing from other operators, reading the Lind SignSpring emails and watching the installation videos, I thought the system was too good to be true. I wondered how a little spring could replace 3,000 lbs. ratchets that we've been using for 20 years."

"I wanted to see an installation for myself and work directly with the installers. On October 17, 2015 I was given the opportunity to work on 55'x90' SignSpring wallscape installation. I accompanied Lind crews and we installed a 5,000 square foot vinyl simply by pushing BannerSpring tips into the 7 oz vinyl perimeter at 1' intervals.

I was so impressed that I immediately ordered BannerSprings for our Detroit wallscapes and bulletins.

I am still amazed, this could be the best innovation since vinyl signage itself. Lind SignSpring is actually better than advertised. I've never seen anything like it."
