

Magnetic Signs

- When not using your magnetic sign, keep it in a clean, dry place such as the side of a fridge or file cabinet.
- Store your rolled magnetic sign on end with the printed or vinyl side out. Avoid storing rolled magnetic for long periods.
- Avoid placing objects on top that could damage the face; do not stack with magnetic sides facing each other.
- Do not store in a hot vehicle. Magnetic can conform to the shape of metal objects.

Preparing Magnetic-Receptive Surfaces

- Before affixing your magnetic sign to a metal surface, be sure all surface paints, clear coats and waxes are cured (hardened).*(Approximate curing times: paint-90 days; clear coat-60 days; wax-2 days.)
- Clean the metallic surface and the magnet with mild detergent.
- Wipe with a soft cloth or allow to dry.

Applying Magnetic Signs

- If possible, affix to a smooth, flat or gently curved metallic surfaces.
- Make sure the entire magnet is flat against the metal surface (i.e., no air pockets).
- If you place the magnet in the wrong position, completely remove the magnet from the surface and reaffix. Do not pull the magnetic sign across the surface, or it may stretch due to the resistance caused by the high magnetic strength.
- Avoid use on horizontal metal surfaces exposed to direct sunlight (such as automobile hoods) or temperatures exceeding 150 degrees F.
- Be aware that long-term use on surfaces frequently exposed to sunlight (such as vehicles) can result in uneven fading of the surface because the magnet-covered area is shielded from ultraviolet rays.
- Avoid use on non-metallic body fillers, simulated wood grain siding and repainted surfaces.

Cleaning Magnetic Sign

- To guard against moisture and dirt buildup between the magnet and the metal surface, remove the magnet at regular intervals. Clean both the magnet and metal surface with mild detergent; wipe with a soft cloth or allow to air-dry. (For vehicle-mounted signs, remove and clean WEEKLY.)
- To protect fresh clear coat, base coat and/or vinyl surfaces on new cars and trucks, remove magnetic signs DAILY.

Proper use and care will extend the life of your magnetic sign and protect the metallic surface to which it is applied. Jill's Custom Signs is not responsible for stolen or blown-off magnetics, or damage incurred to client's vehicle by their neglect of these instructions.
