

Customer Advisory Bulletin

Document # **CAB-00456, rev. A**

Issue Date **October 31, 2012**

Running a Daily White Print

This bulletin provides notification that a white print must be run daily on the printer.

It is important that customers are aware that an 11 x 17 white print must be run daily on the printer. When the white heads are not used, ink will settle in the heads, causing clogged nozzles.

Running a daily white print will keep white ink moving through the heads, will prevent clogged nozzles, and will increase the life of the heads.
